PRESS RELEASE

SHARON, MA - July 2009:

We are pleased to offer liquidoranges STUDIO designs on highly specialized photographic film applied to the glass surface, creating stunning architectural glass components for interior use. The results are dramatic, vivid colors of transparency and translucency. This is NOT a printing process, and there is NO pixelation.

liquidoranges has invested countless hours of research, development, testing and abuse trials to achieve an amazingly sophisticated application for art in Interior Architecture. some typical uses:

- stain glass substitute
- art glass murals
- stair glass guardrail systems
- privacy screens
- art as wayfinding
- kiosks
- reception desks with lighting
- furniture design
